SUMMARY

Cyber Security undergraduate focused on penetration testing, vulnerability assessment, and web application security. Hands-on experience building security labs and Python-based security tools, with practical exposure to reconnaissance, enumeration, network scanning, service identification, and vulnerability testing in controlled environments. Familiar with Burp Suite, Nmap, Wireshark, Linux, TCP/IP, OWASP Top 10, SQL Injection, and XSS. Seeking an entry-level VAPT / Penetration Testing role to contribute practical security-testing skills.

ACHIEVEMENTS

Penetration Testing: Reconnaissance, Enumeration, Vulnerability Assessment, Network Scanning, Port Scanning

Web Application Security: OWASP Top 10, SQL Injection, Cross-Site Scripting (XSS), Web Application VAPT, Burp Suite

Security Tools: Nmap, Burp Suite, Wireshark, OpenVAS / Greenbone

Programming: Python, Object-Oriented Programming, Data Structures & Algorithms

Networking: TCP/IP, Network Scanning, Port Scanning, Service Enumeration, Cisco Packet Tracer

Operating Systems & Development: Linux, Git, GitHub, VirtualBox

PROJECTS

Custom VAPT Lab | Technologies: Linux, VirtualBox, Nmap, Vulnerable VMs

[Link](#)

- Built an isolated penetration-testing laboratory using vulnerable virtual machines for security assessment practice.
- Performed reconnaissance, host discovery, port scanning, service enumeration, and vulnerability identification.
- Practiced structured VAPT workflows from target discovery through security analysis in a controlled environment.
- Used Linux-based security tooling to analyze exposed services and understand common attack surfaces.

Python VAPT Scanner | Technologies: Python, Nmap, Linux

[Link](#)

- Developed a Python-based security scanner to automate basic network reconnaissance and vulnerability assessment tasks.
- Integrated Nmap for host discovery, port scanning, and service enumeration.
- Automated repetitive scanning activities and organized scan results for security analysis.
- Applied Python scripting to improve efficiency in basic penetration-testing workflows.

Password Strength Tester | Technologies: Python

[Link](#)

- Developed a Python-based password security assessment tool to identify weak password characteristics.
- Implemented checks for password length, character diversity, numbers, special characters, and common weak-password patterns.
- Generated user-friendly feedback and recommendations for creating stronger passwords.

EDUCATION

Avanthi Institute of Engineering and Technology — Hyderabad, India

B.Tech in Computer Science (Cyber Security)

2023 – 2027 | Expected | **CGPA: 7.5 / 10**

ACHIEVEMENTS

1st Prize — College-Level Smart India Hackathon | Team Leader

- Secured 1st Prize at the college-level Smart India Hackathon.
- Led the team in developing and presenting a Secure Data Wiping project.
- Coordinated technical development, team activities, and project presentation.

EXPERIENCE / TRAINING

CRAW Hyderabad — Hyderabad, India

Cybersecurity Trainee | October 2025 – Present

- Applied cybersecurity fundamentals across Linux, networking, ethical hacking, and penetration-testing workflows.
- Practiced reconnaissance, enumeration, service identification, and vulnerability identification in controlled laboratory environments.
- Used common security tools to perform hands-on security testing and analyze potential attack surfaces.
- Strengthened practical understanding of network and web application security through lab-based exercises.

CERTIFICATIONS & COURSES

- Certified LLM Security Expert (CLLMSE) — Red Team Leaders, 2026
- Ethical hacker — Cisco, 2026
